

Senior Performance Analyst

Location: UK-London

An opportunity exists in a leading Investment Management organisation for an individual to join their Performance Team as a Senior Performance Analyst.

The role will report to the team manager and the main objectives of the role are to be involved in the day to day activities of the Performance team, play an active part in assisting the team leader with the management of the equity performance responsibilities and the team members, assess performance needs of the business through close liaison with relationship managers, portfolio managers, and the client support group.

The required skills for the role are performance measurement experience including significant knowledge of equity attribution and a working knowledge of fixed income attribution, be technically proficient across all asset classes, have knowledge of quantitative investment techniques, possess excellent communication skills, be a strong team player, able to manage a wide range of conflicting priorities and be experienced in operating in a fast paced environment.

In addition preferred experience would be usage of Barra Enterprise performance, some working knowledge of Statpro, experience of working with quantitatively oriented fund managers, and supervisory or management experience would be a distinct advantage.
