

Fixed Income Performance Manager

A fantastic new opportunity has arisen for a Performance Manager in one of the world's leading Asset Management houses. This role has fantastic exposure to a front office environment with constant interaction involving fund managers and clients. You will be in charge of a team of 6 analysts focusing on Fixed Income.

Our client is after an experienced candidate who enjoys constant interaction with high end management, and prime brokerage. Your role will also include producing attribution reports to quantify and follow investment decision processes, as well as a variety of risk calculations. You will also have meticulous attention to detail, and be confident enough to present your ideas to Fund Managers and actively take part in the development of particular funds and limit their exposure to risk.

This role is for someone with exceptional organisational skills, and can manage a varying but constant work load. The role involves taking this department forward, and being able to think of new strategies for this global firm. The candidate must have been a Senior Performance Analyst or Risk Manager with Performance Attribution experience in Asset Management. A degree in a Mathematical subject is a must! Management experience is not a necessity but is desirable.
